DETAILED ACTION***Election/Restrictions***

The amendment filed on 28 April 2005 canceling all claims drawn to the elected invention and presenting only claims drawn to a non-elected invention is non-responsive (MPEP § 821.03). The remaining claims are not readable on the elected invention because previously examined claims 93-120 are directed towards methods for the particular storage in memory locations of both color specifications, font characteristics specifications, and color schemes and a plurality of software modules that access the memory sections to share the same set of specifications/characteristics in order to provide a uniform appearance or scheme across applications. Newly presented claims 121-148 are directed towards various methods for specifically providing the user with particular interface configuration windows so as to separately configure the display for a given application as opposed to the embodiment wherein the user simply designates an interface scheme. Newly presented claims 121-148 do not require the particulars as to the particular usage of memory allocation and the sharing of designated attributes across multiple software modules in order to provide a consistent appearance and furthermore do not appear to be embraced by the Summary of the Invention as originally filled.

Since the above-mentioned amendment appears to be a *bona fide* attempt to reply, applicant is given a TIME PERIOD of ONE (1) MONTH or THIRTY (30) DAYS, whichever is longer, from the mailing date of this notice within which to supply the omission or correction in order to avoid abandonment. EXTENSIONS OF THIS TIME PERIOD UNDER 37 CFR 1.136(a) ARE AVAILABLE.
